

Installation Guide

This procedure is designed as an installation aid. Skilled tradespeople that are familiar with general construction and electrical installation techniques should perform the installation. Licensed electricians should provide electrical installation connections. Installations and connections should be done in accordance with all national and local codes and permits. In no way is this document intended to construe warranty or fitness of use of the products described, nor is it intended to provide safety instruction for those installing the product.

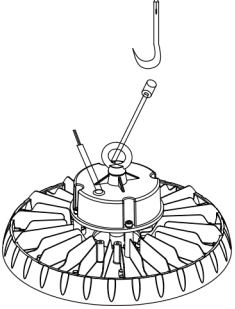

Eye Bolt Installation

1 Drill a screw hole at the installation site

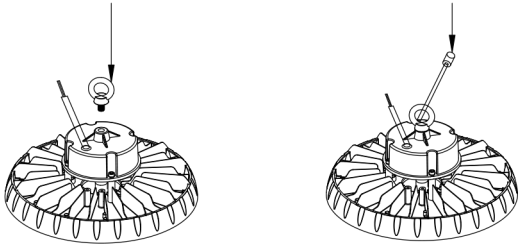

2 Install a hook at the installation site

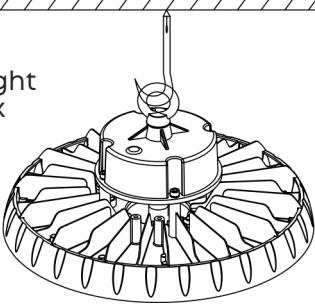

3 Hang the lifting ring and safety rope on the hook

Install the lifting ring into the lifting ring hole Insert the rope into the lifting ring

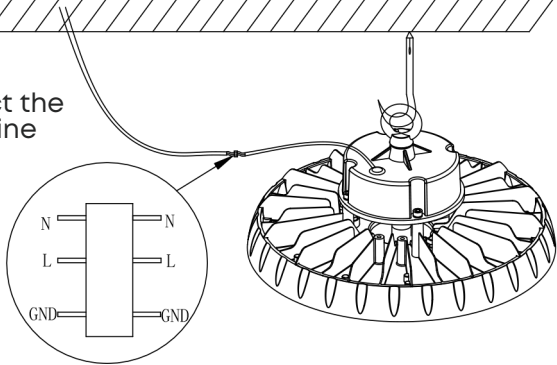

Hang the light on the hook

4

Connect the power line

5

6

Wires		Connect the wires	Wires		Signal wires
		*AC L (Brown or Black)			*DIM+ (Blue or Purple)
		*AC N (Blue or White)			*DIM- (White or Gray)
		*AC (Green/Yellow or Black)			

Power and CCT Adjustable

Use a flathead screwdriver to unscrew the DIP switch cover. Adjust the CCT and power DIP switches to the corresponding positions, then screw the DIP switch cover back onto the power supply.

⚡ WARNING

Before proceeding with installation or service maintenance of this product:

- Disconnect power to reduce electrical shock risk.
- Review the entire Installation Guide.
- Inspect this properly packaged product for any damage that may have occurred during transit.
- Verify product application complies with manufacturer design recommendations.
- Verify the availability of necessary tools and incidental material.
- Verify applicable code requirements. Field assembly and installation are subject to acceptance by local inspection authority.
- Appropriate safety equipment to be determined by end user, per applicable safety standards and precautions.
