Test Method

The test was conducted according to ANSI/UL 1598:2008, Section 19, the luminaire shall be installed or supported to simulate intended usage, in accordance with the manufacturer's instructions.

The ambient temperature in which measurements are being taken shall be maintained at $50^{\circ}\text{C} \pm 5^{\circ}\text{C}$.

The apparatus construction followed the description in ANSI/UL 1598 for normal temperature test. Thermocouples were placed on the LED package that the location was indicated by LM-80 report.

The temperatures shall be measured after they have stabilized, when the test has been running for a minimum of 7.5 hours or the test has been running for a minimum of 3 hours and three successive readings taken at 15 min intervals are within 1°C of one another and are not rising.

ISTMT test location according to LM80 report provided by client, for further information please see report no. IESNA LM-80 test report for LUXEON 3030 2D (Jan. 17, 2020) and IESNA LM-80 test report for LUXEON 5050 (Sep. 20 2018) issued by Lumileds Malaysia Sdn. Bhd. Reliability Test Laboratory.
